QUALITY FEEDS FOR PHEASANTS, PARTRIDGES & WILDFOWL

THE PHEASANT RANGE

GAME SUPERSTARTER CRUMBS

27% PROTEIN - Contains Avatec® (Coccidiostat), Avipro® Plus, and Herban™

A high protein super fine crumb containing fish meal. This provides chicks with a source of protein which is similar to natural feed sources. Game Superstarter Crumbs will give day old chicks an excellent start.

NUMBER ONE CRUMBS

25% PROTEIN - Contains Avatec® (Coccidiostat), Avipro® Plus, and Herban™

A medium sized crumb containing fish meal. Number One Crumbs are ideal for starting pheasant chicks or to follow on from Game Superstarter Crumbs. The correct balance of essential nutrients ensures that chicks are provided with the optimum start that they require.

SUPER MICRO PELLETS

25% PROTEIN - Contains Avatec® (Coccidiostat), Avipro® Plus, and Herban™

A 2mm micro pellet, containing fish meal, which can be used to follow on from our Number One Crumbs. Super Micro Pellets are designed to allow a smooth transition from crumbs to pellets, without the stress of a decline in protein.

NUMBER TWO MINI PELLETS

22% PROTEIN - Contains Avatec® (Coccidiostat), Avipro® Plus, and Herban™

A 2.2mm mini pellet with high energy to help promote growth in the young bird. High levels of the essential amino acid methionine promotes good feathering in the chicks. Number Two Mini Pellets are an ideal size for either following on from our crumbs or micro pellets.

SUPER GROWER PELLETS

22% PROTEIN - Contains Avatec® (Coccidiostat), Avipro® Plus, and Herban™

A 3mm pellet with the same formulation as the Number Two Mini Pellet. Tailored to provide the density of diet required by the modern small bodied bird.

NUMBER THREE GROWER PELLETS

20% PROTEIN - Contains Avatec® (Coccidiostat), Avipro® Plus, and Herban™

A 3mm pellet designed to take the pheasant from our Number Two Mini Pellets through to release. This slightly more fibrous diet acclimatises the gut to the type of food that will be encountered after release.

NUMBER FOUR POULT PELLETS

18% PROTEIN - Contains Avatec® (Coccidiostat), Avipro® Plus, and Herban™

A high protein specification 3mm pellet providing all the essential nutrients that a fast maturing bird requires. This ration is ideal for use in release pens and surrounding cover crops shortly after release. Added spice will help to hold the birds where you want them.

Number Four Poults Pellets contain Avatec and must be withdrawn at least 5 days before birds are killed for human consumption.

NUMBER FIVE COVERT/MAINTENANCE PELLETS

17% PROTEIN

A non-medicated 3mm pellet with added spice, suitable for feeding throughout the shooting season. Formulated with the correct energy/protein ratio to keep your birds fit, not fat.

NUMBER SIX BREEDER PELLETS

18% PROTEIN - Contains Avipro® Plus

A high energy 3mm pellet designed to maximise egg production. Extra vitamins and minerals are added to promote shell quality, and hatchability. Number Six Breeder Pellets contain extra enzymes which the bird cannot produce itself to improve digestion and mineral availability.

FEEDING GUIDELINES FOR PHEASANTS

Age of bird (weeks)	Standard Feeding Programme	Optional products	Usage Guide 20kg bags per 1000 birds per week
1	No.1	Superstarter	1
2	No.1	-	5
3	No.2	Super Micro	5
4	No.2	-	10
5	No.3	Super Grower	15
6	No.3	Super Grower	15
7	No.3	-	20
8	No.3	-	20
9	No.3	No.4	20
10	No.3	No.4	20
11	No.3	No.4	20
12	No.3	No.4	20

From 12 weeks onwards feed No.5 maintenance pellets and/or wheat

THE PARTRIDGE RANGE

GAME SUPERSTARTER CRUMBS

27% PROTEIN - Contains Avatec® (Coccidiostat), Avipro® Plus, and Herban™

A high protein super fine crumb containing fish meal. This provides chicks with a source of protein which is similar to natural feed sources. Game Superstarter Crumbs will give day old chicks an excellent start.

NUMBER ONE CRUMBS

25% PROTEIN - Contains Avatec® (Coccidiostat), Avipro® Plus, and Herban™

A medium sized crumb containing fish meal. Number One Crumbs are ideal for starting pheasant chicks or to follow on from Game Superstarter Crumbs. The correct balance of essential nutrients ensures that chicks are provided with the optimum start that they require.

SUPER MICRO PELLETS

25% PROTEIN - Contains Avatec® (Coccidiostat), Avipro® Plus, and Herban™

A 2mm micro pellet, containing fish meal, which can be used to follow on from our Number One Crumbs. Super Micro Pellets are designed to allow a smooth transition from crumbs to pellets, without the stress of a decline in protein.

NUMBER TWO MINI PELLETS

22% PROTEIN - Contains Avatec® (Coccidiostat), Avipro® Plus, and Herban™

A 2.2mm mini pellet with high energy to help promote growth in the young bird. High levels of the essential amino acid methionine promotes good feathering in the chicks. Number Two Mini Pellets are an ideal size for either following on from our crumbs or micro pellets.

PARTRIDGE GROWER PELLETS

20% PROTEIN - Contains Avatec® (Coccidiostat), Avipro® Plus, and Herban™

A 2.2mm mini pellet designed to take the birds from 8 weeks of age through to release. The slightly higher level of fibre compared with our Number Two Mini Pellets helps to acclimatise the gut to the natural food that will be encountered upon release. Partridge Grower Pellets contain Avatec and must be withdrawn at least 5 days before birds are killed for human consumption.

PARTRIDGE MAINTENANCE PELLETS

17% PROTEIN

A non-medicated 2.2mm pellet with added spice, suitable for feeding throughout the shooting season. Formulated with the correct energy/protein ratio to keep your birds fit, not fat.

PARTRIDGE BREEDER PELLETS

19.5% PROTEIN - Contains Avipro® Plus

A 2.2mm pellet designed to maximise egg production. Extra vitamins and minerals are added to promote shell quality, and hatchability. Partridge Breeder Pellets contain extra enzymes which the bird cannot produce itself to improve digestion and mineral availability.

FEEDING GUIDELINES FOR PARTRIDGES

Age of bird (weeks)	Standard Feeding Programme	Optional products	Usage Guide 20kg bags per 1000 birds per week
1	Superstarter	-	1
2	No.1	-	3
3	No.1	Super Micro	3
4	No.2	Super Micro	6
5	No.2	Super Micro	6
6	No.2	-	10
7	No.2	-	10
8	Partridge Grower	-	15
9	Partridge Grower	-	15
10	Partridge Grower	-	15
11	Partridge Grower	-	15
12	Partridge Grower	-	15

From 12 weeks onwards feed Partridge Maintenance Pellets and/or wheat

WILDFOWL RANGE

COUNTRY CHICK CRUMBS

19% PROTEIN

A non-medicated starter crumb suitable for young ducklings. Feed for first three weeks. Typical usage is 12 bags per 1000 birds per week.

DUCK GROWER PELLETS

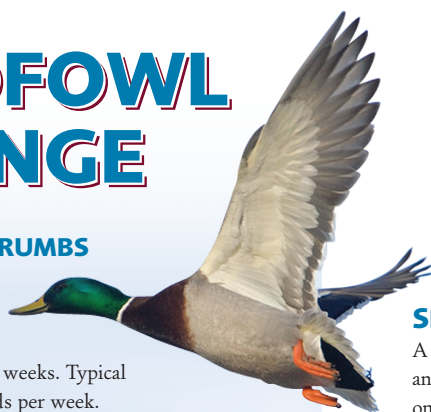

20% PROTEIN

A specialist high energy, high protein ration available to order (minimum 4 tonnes). Duck Grower Pellets are recommended for intensive rearing systems where a fast growth rate is required.

NUMBER 5 MAINTENANCE PELLETS

17% PROTEIN

A non-medicated 3mm pellet suitable for following on from our Country Chick Crumbs through to maturity. Typical usage is 40 bags per 1000 birds per week.

HEYGATES HOLDING MIXTURES

SPICED CUT MAIZE

A bold cut maize sprayed with aniseed oil which will hold pheasants to an area. When mixed with wheat, pheasants and partridges spend longer on the feed ride looking for the maize.

CUT MAIZE

An economical alternative to Spiced Cut Maize which adds interest to the feed when mixed with wheat.

HEYGATES COVERT CONCENTRATE

A combination of linseed, lentils, cut maize, red dari, striped sunflowers, and aniseed.

AVIPRO® PLUS

Avipro Plus is a tailor-made package of natural products which is designed to aid immunity, digestion, and general health. It includes a yeast, organic selenium, and a natural anti-bacterial. This is a market-leading health package to give optimal results. Avipro Plus has been shown to reduce scouring and wet litter, reduce mortality and improve growth rates.

AVATEC®

Avatec is included in the starter and grower rations to help prevent coccidiosis. A prescription is not required for Avatec, but must be withdrawn at least 5 days before the birds are killed for human consumption.

HERBAN™

Herban is a concentrated mix of Oreganum Essential Oil which maintains gut integrity, supporting the health status of game birds. The blend of oil from natural extract offers a unique taste and flavour to support water and feed consumption during periods of stress. As Herban only contains 100% natural ingredients, there is no withdrawal period or prescription required.

MEDICATED DIETS

AUROFAC®

This is a broad spectrum antibiotic used to treat a wide range of diseases.

FLUBENVET®

For the control of parasitic worms.

Aurofac® and Flubenvet® can only be supplied when a valid prescription has been received. Heygates can request a prescription from the customer's vet but this can only happen following contact between the customer and the vet.

Please allow extra lead time when ordering medicated feeds because the feed cannot be manufactured until a prescription has been received by Heygates.
